

Annual Press Conference 2008

The Bank promoting European objectives

Luxembourg, 28 February 2008

List of financing operations in 2007

The lists below show the main detailed figures for the EIB's activities in 2007. This information will be published in "Volume III – Statistical Report" of the EIB Group's 2007 Annual Report.

Loans concluded for capital investment in 2007 totalled EUR 47 820 million (see detailed breakdown in table below). These operations give rise to financial commitments for the Bank and are accounted for in its balance sheet.

The EIB cooperates closely with a large number of financial institutions and commercial banks, with which it concludes credit lines for financing small and medium-scale projects in the industrial, services, health, education and infrastructure sectors. It also grants loans earmarked for specific projects through the intermediary of financial institutions and commercial banks.

The EIB also provides direct loans for firms or public authorities where the projects are clearly in line with its priorities.

For further information on the EIB, visit its website www.eib.org.
