Environmental and Social Completion Sheet (ESCS)¹

Overview

Project Name:	<i>ADVANCED MEDICAL RESEARCH POLAND II</i>
Project Number:	<i>20170342</i>
Country:	<i>Poland</i>
Project Description:	<i>The project will support the medical research carried out in the public medical universities and medical scientific institutes in Poland from 2018 to 2020.</i>

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

No significant environment or social issues were noted.

The project involves medical R&D activities carried out within already authorized research facilities and as such do not require an Environmental Impact Assessment (EIA) as per Directive 2014/52/EU amended Directive 2011/92/EU.

Investing in medical research contributes to better health care and improved health status of the population as successful investments in medical R&D lead to practical applications of scientific discoveries resulting in more effective prevention measures, new diagnostic tests and innovative therapies. It further stimulates the creation of high quality jobs. Therefore, the project is expected to lead to significant social benefits.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter during the Project implementation that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
