Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	<i>PROGRAMM NAHVERKEHR BADEN-WUERTTEMBERG NETZ 3A</i>
Project Number:	<i>2016-0949</i>
Country:	<i>Germany</i>
Project Description:	Investment into rolling stock in Baden-Wuerttemberg (Network 3a Murrbahn - Northeast of Stuttgart). Sub-operation under Program Loan for rolling stock and related infrastructure for local and regional public transport in Baden-Wuerttemberg (2014-0765).

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion:

The project was appraised in 2017 and an Environmental and Social Data Sheet was prepared.

The purchase of rolling stock does not fall under either Annex I or II of the Environmental Impact Assessment (EIA) Directive 2011/92/EU, as amended; therefore an EIA was not required.

No maintenance depots were built with this financing at the end and therefore the undertakings were not relevant for the project.

The appraisal had not identified environmental or social risks. As there was no new depot, the trains operate on existing infrastructure and were therefore not contributing to new environmental risks. The new trains make a positive contributions towards social objectives. They offer better and improved quality of public transport including but not limited to offering more level access to trains through compliance with TSI PRM.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the Promoter during construction that the project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
