Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	Turku Urban Infrastructure
Project Number:	2016-0986
Country:	Finland
Project Description:	The project concerns financing of a multi-sector investment programme of the City of Turku in the period 2017-2022 comprising small to medium sized schemes related to education, culture, social housing, energy, transport and other urban infrastructure.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The Project supported sustainable urban development, and modernisation of public infrastructure and services through investments in the sectors of education, energy efficiency, culture, social housing and urban mobility, in line with the development strategy of the City of Turku.

None of the schemes was subject to an Environmental Impact Assessment and no Natura 2000 sites were affected by the Project. No significant environment or social issues were noted, and the net environmental and social impact of the programme is deemed positive.

Summary opinion of Environmental and Social aspects at completion:

Based on reports from the promoter, EIB is of the opinion that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of the appraisal.
