Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	SPCM New Facility
Project Number:	2018-0422
Country:	France
Project Description:	Financing of the construction of a greenfield polyacrylamide production facility in Dunkirk as well as RDI investments for the period 2019-2022.

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project implementation was adjusted in response to market condition, resulting in a shift towards the production of a new monomer. The new facility has been commissioned in mid-2024. The Dunkirk site currently employs around fifty people.

While the project scope was adjusted due to market conditions, the project has contributed to regional development while maintaining strong environmental performance and safety standards.

Environmental permits were obtained and shared with the EIB services.

EIB is of the opinion, based on reports from the promoter and project documentation, that the project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
