Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	<i>ICF BARCELONA ROLLING STOCK</i>
Project Number:	<i>2021-0540</i>
Country:	<i>Spain</i>
Project Description:	<i>Financing the acquisition of 8 electric trainsets to be operated in the underground network of the city of Barcelona by the municipal operator Ferrocarrils Metropolitans de Barcelona</i>

Summary of Environmental and Social Assessment at Completion

EIB notes the following Environmental and Social performance and key outcomes at Project Completion.

The project entailed the acquisition of eight electric trainsets operated in the metro underground network of the city of Barcelona (Spain). This acquisition is part of the rolling stock renewal proposal included in the Infrastructure Master Plan 2021-2030 of Barcelona's Metropolitan Area.

The promoter informed the Bank on the removal of the asbestos present in some parts of the life expired metro cars as well as on the decommissioning of the six old trainsets replaced (series 2000) in line with applicable EU legislation and shared the decommissioning certificates. Finally, the Promoter developed a monitoring system to follow the efforts towards reducing sexual harassment in the metro network including among other measures real-time video surveillance on metro trainset series 7000 and 8000.

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter inputs provided that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
