## Environmental and Social Completion Sheet (ESCS)

### Overview

Project Name: ALLEGO BV (TRANSPORT CHARGING INFRASTRUCTURE)  
Project Number: 2018-0326  
Country: Netherland  
Project Description: The Project contemplates a quasi-equity investment in Allego BV, an electrical vehicle (EV) charging solution provider with Pan-European ambitions.

### Summary of Environmental and Social Assessment at Completion

**EIB notes the following Environmental and Social performance and key outcomes at Project Completion.**

No environmental impact assessment was required during the project implementation.

The electric vehicle charging infrastructure has powered electric vehicles and generated the expected environmental benefits in terms of carbon and pollutant emissions reduction and hence contributed to the reduction of CO2 emissions of the transport sector.

#### **Summary opinion of Environmental and Social aspects at completion:**

EIB is of the opinion based on reports from the promoter during the charging network deployment, that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
