

Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	BUCHAREST S4 THERMAL REHABILITATION
Project Number:	2011-0511
Country:	Romania
Project Description:	Energy efficiency refurbishment of 116 multi-storey residential buildings in sector 4 of Bucharest

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

Overall, the Project brings environmental and social benefits. No significant environment or social issues were noted during the Project's implementation period.

The Project supported a significant reduction in energy consumption in 116 residential buildings of Bucharest Sector 4 and thus helped mitigate climate change by avoiding CO₂ emissions associated with the production of heat. The refurbishment works were implemented between 2012 and 2013. Given the scale, location and nature of the Project, it was not subject to a full EIA as defined under the EIA Directive 2011/92/EU.

Summary opinion of Environmental and Social aspects at completion:

The EIB is of the opinion, based on reports from the promoter, site visits by the EIB team and inputs provided by the EIB's verification consultants during construction, that the Project has been implemented in line with EIB Environmental and Social Standards applicable at the time of appraisal.
