Environmental and Social Completion Sheet (ESCS)

Overview

Project Name:	W Macedonia Waste PPP Project
Project Number:	2011 0280
Country:	Greece
Project Description:	The project comprises the design, construction, operation and maintenance of waste transfer, treatment and disposal facilities in the area of West Macedonia (Greece).

Summary of Environmental and Social Assessment at Completion

EIB notes the following key Environmental and Social outcomes at Project Completion.

No major environmental or social issues occurred during the construction period. The project was reportedly positively received by the local society, which is unusual for waste management projects in Greece. This was achieved by communicating that the new plant will only have positive impacts at both environmental and social levels.

All required permits, licenses and approvals were obtained in time and renewed as scheduled (Building Permit, Installation Permit, TEPEM, ADET, Design Approvals, Fire safety Certificate, Fuel Station Permit, Operation Permits, etc.)

Summary opinion of Environmental and Social aspects at completion:

EIB is of the opinion based on reports from the promoter, site visits by the EIB team and inputs provided by Lenders' Technical Advisors during Construction that the Project has been implemented in line with EIB Environmental and Social Standards, applicable at the time of appraisal.
